

Refrigeration Developments
and Testing Ltd

Refrigeration Developments and Testing (RD&T)

- ✓ Design
- ✓ Develop
- ✓ Test

Our services:

- Retail and commercial cabinet testing
- Refrigeration system development
- Test packages
- Mathematical modelling
- Design and optimisation
- Energy reduction

Introduction to RD&T:

RD&T was set up in August 2009 by ex University of Bristol, FRPERC (Food Refrigeration and Process Engineering Research) employees. The company involves Judith Evans, Tim Brown, Alan Foster and Edward Hammond and offers a unique service that transfers research knowledge into industrial projects.

RD&T offers a unique service that transfers research knowledge into industrial projects. RD&T carries out work on food refrigeration, refrigeration development, cabinet testing, and heat and mass transfer. The company involves Judith Evans, Tim Brown, Alan Foster and Edward Hammond.

Services include design and testing of domestic, commercial and retail refrigeration systems. We can help at all stages from initial concept to development of prototypes to final optimisation and testing. RD&T combines the use of advanced mathematical modelling tools with practical design knowledge and skills to provide expert applied solutions.

RD&T are accredited to ISO9001, ISO14001 and ISO18001.
